# EMPLOYEE EXPERIENCE PORTAL

an **SAP SuccessFactors**  add-on

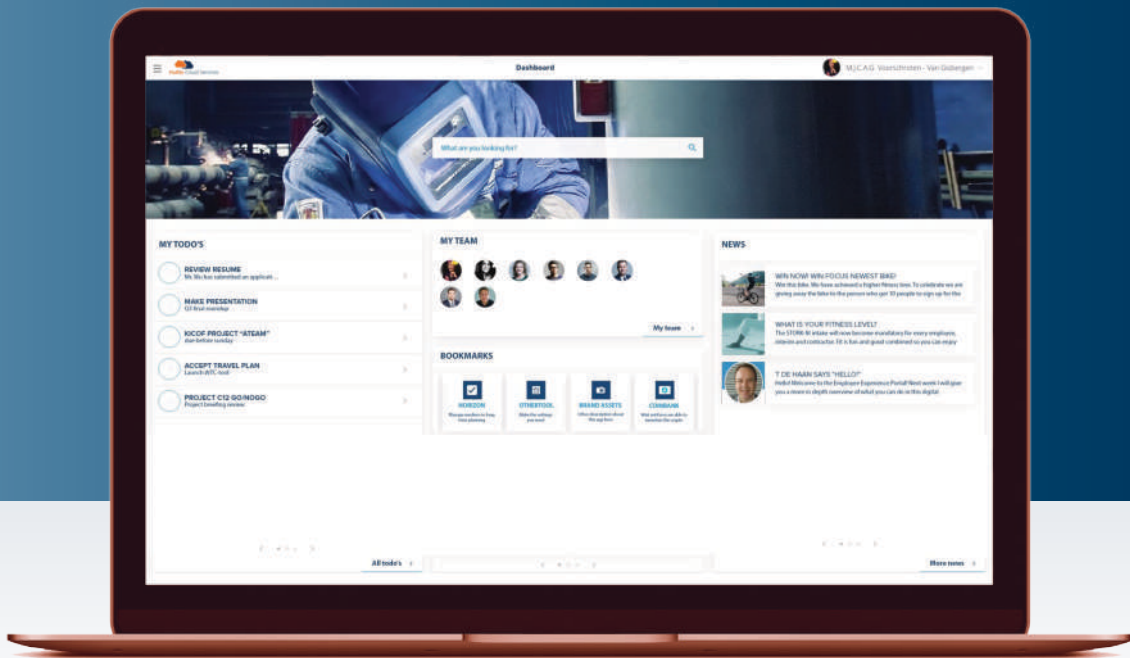

As the world becomes increasingly digital, every employee has to work with countless applications that should make the organization and employee more efficient and effective.

The reality is that most employees find all these different systems confusing and no longer have a clue how to access them and what they can find where.

This will be a thing of the past with our **Employee Experience Portal!**

The Employee Experience Portal is designed around the employee as a single access point with your own look and feel and which is geared towards the needs of your employees.

## THE GATEWAY FOR YOUR EMPLOYEE

No matter what kind of application you use to help, facilitate, inform, train or develop your employee, they can now all be integrated into your own fully personalized business portal. With single sign-on, secure authentication, personalized settings and of course 100% mobile and desktop friendly.

## FEATURES AND BENEFITS
