PAYROLL CHANGE REPORT

an **SAP SuccessFactors**  add-on

With the **Payroll Change Report** you're able to export all relevant payroll changes to one export or report. In this way you can efficiently check the changes made in SuccessFactors and use this input for third party payroll systems.

When exporting to Excel all relevant changes (hires, terminations, job changes, salary changes, etc) are marked and directly visible for the payroll administrator. With the **Payroll Change Report** you can easily use the output for all kind of third party payroll systems without realizing specific integrations.

FEATURES AND BENEFITS

- ✓ Real time integration with SuccessFactors
- ✓ Extended delta mechanism to provide you an overview of all relevant data changes
- ✓ All selection options available for executing reports
- ✓ Based on role based permissions of SuccessFactors
- ✓ Different output options possible
- ✓ Template based implementation for quick deployment
