## RESOURCE MANAGER

an **SAP SuccessFactors**  add-on

When you need to request resources to fill up a new or open position, this often takes a lot of time for a manager, is very inefficient, can be frustrating and there is hardly any control on the process and budget.

This can all be history with our **Resource Manager**, where you have one central entry point for requesting new resources in a quick and intuitive way fully integrated with SuccessFactors Recruiting and Employee Central.

## WITH THIS GREAT APPLICATION MANAGERS GET...

- ✓ A clear and easy process for requesting resources (internal, external, temporary, replacements, etc.)
- ✓ A guided process that respects company policies, workflows and guidelines
- ✓ Full insight in the status of vacancies from requests until approval
- ✓ Open tasks visible in My To Do's
- ✓ Options to prefill vacancies with standard responsibilities & requirements, based on our job description library which is based on your company's job framework
- ✓ Automatic notifications and workflows
- ✓ Vacancies will be directly created in your ATS and sent to the appropriate channels (internal or external)
- ✓ Out-of-the box integration with SuccessFactors Recruiting and SuccessFactors Employee Central
- ✓ Integration with external suppliers/agency's (like USG People, Randstad) based on SETU

So, no matter if you need to create a new position, replace someone, have a need for an internal or external employee, for temporary or permanent positions, you can now arrange it all within our **Resource Manager!**

Do you also want your managers to be able to easily request their own resources? Contact us directly to get more info, or request a demo!
